

SILOTANK

CAT AND MOUSE LEVEL INDICATOR

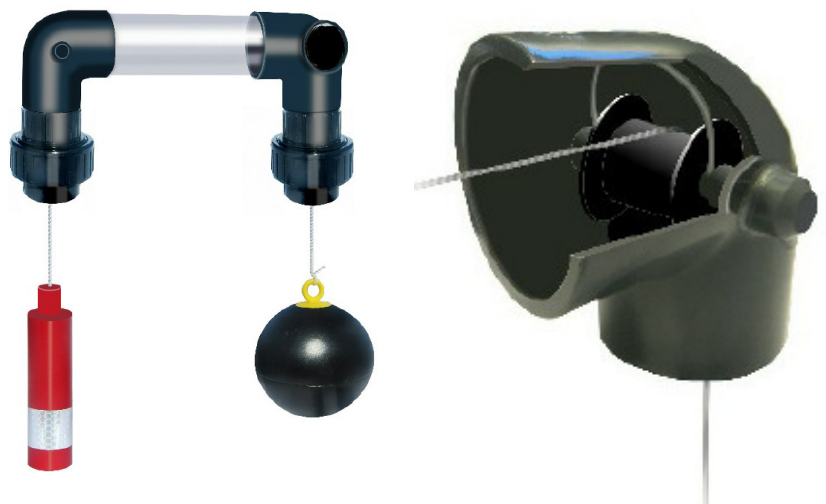

Silotank's Cat and Mouse Tank Level Indicator allows an easy and precise reading of the tank level. The float within the tank is suspended by a cable, supported by 2 No 90° PVC elbow pulleys in a special 'no jump' system. The counter pulley system, the volume of liquid in the tank is shown within a clear PVC pipe which is installed externally, parallel to the tank.

Installation:

Supplied as a complete kit ready to be bolted on for installation

Benefits:

- Manufactured with chemically resistant materials
- Recommended for virtually any liquid
- Easy to install
- Can be supplied with tank level indication strip
- Can be used with magnetic level control switches
- Low maintenance
- Gas./Vapour tight
