

Mixers

Silotank can supply a range of custom designed mixers that can be either top, bottom or side mounted into the tank. These can be manufactured using different materials or be coated depending on the chemical or liquid that is being mixed. Working along side our suppliers we ensure all mixers can be easily installed and maintained during the life of the mixer and tank ensuring there is adequate access into the tank.

Available in 240v or 3 phase we can deliver a 1 stop solution to your chemical and mixing requirements.

Mixer Bridges

Silotank can supply a range of mixer bridges to compliment our range of tanks. Available as free standing or where suitable fabricated into the tank shell Silotank can offer you a solution to your mixing requirements.

Our engineers ensure that all calculations are carried out to include material density, weight of mixer and pull force from mixer. For steel mixer bridges they will be supplied with full CE marking.

Mixer bridges available in Galvanised Mild Steel, Stainless Steel and GRP.
